

PORT WINE | PORTUGAL

PORTUGUESE TALENT

Barros Colheitas are wines of high quality that are produced from a single harvest. While history is made of great moments, talent is perfected over time. These wines are the result of exceptional harvests, and are aged in oak barrels for anything over 7 years, creating extraordinary Port wines. They are magnificent wines – smooth, intense and sophisticated.

VINIFICATION

The wine-making process includes the halting of fermentation by adding the grape brandy, the blending of different wines and the ageing of the resulting wine. Fermentation takes place in vats (lagares) at a controlled temperature of 29°C, until the right degree of sweetness (baumé) is achieved, at which point the grape brandy is added. A wine of high quality, made from one single harvest. A Colheita wine matures in oak barrels for periods of time that can vary, but never less than 7 years. It is then bottled and sold according to the demands of the market.

TASTING NOTES

A vivid amber colour. A complex yet deductive bouquet, where aromas of dried fruit stand out, well-combined with notes of spice. Harmonious and elegant, this wine displays fabulous character, great body and enticing allure. A sweet and enduring finish.

RECOMMENDATIONS

Served chilled, it reveals all its finesse and sophistication, especially when drunk with desserts made with caramel, dried fruit and spice, such as caramel fondant with apple and ginger jelly, tarte tatin, crème brûlée and medium-strength cheeses. Despite the age, its freshness endures. An extraordinary match with a refreshing tangerine parfait.

VINE

The rows of vines are traditionally planted across the slope in horizontal terraces. More recently vines have been planted up the slope (called "vinha ao alto", meaning vertically planted).

SOIL

Schistous-sandstone (greywacke), interspersed with granite in some places.

HEIGHT

Up to 600 metres.

GRAPE VARIETIES

25% Touriga Nacional, 25% Tinta Roriz, 25% Touriga Franca, 25% Tinta Barroca.

TECHNICAL DETAILS

Alcohol 20,00 %vol

pH 3,57

Total Acidity 5,30 g/dm³

Reducing Sugars 145,10 g/dm³

WINEMAKER

Carlos Alves

The wine should be stored in a cool and dry place, sheltered from light and temperature fluctuations, and the bottle should remain in an upright position. Over time, it is natural that sediment will form at the bottom of a bottle of Port wine. To ensure its full quality and flavour, this wine should be stored in bottle for as little time as possible, and should be drunk soon after purchase. Best served at a temperature between 12 and 14°C.
